

Mixer plug-in is the perfect fit for building small mixing/routing applications without breaking your bank account. Loaded with digital signal processing algorithms running in double precision, click-less mute and fast response RMS meters, this plug-in was engineered with versatility and audio quality in mind.

Software features

- . Extensive set of audio algorithms
- . Live tuning, hear the changes real time
- . Save/Load configurations
- . Optional offline system tuning
- . Extensive plotting capabilities
- . Plug & Play setup requires no driver
- . Free Un-limited Upgrades, your plug-in evolves as we evolve!

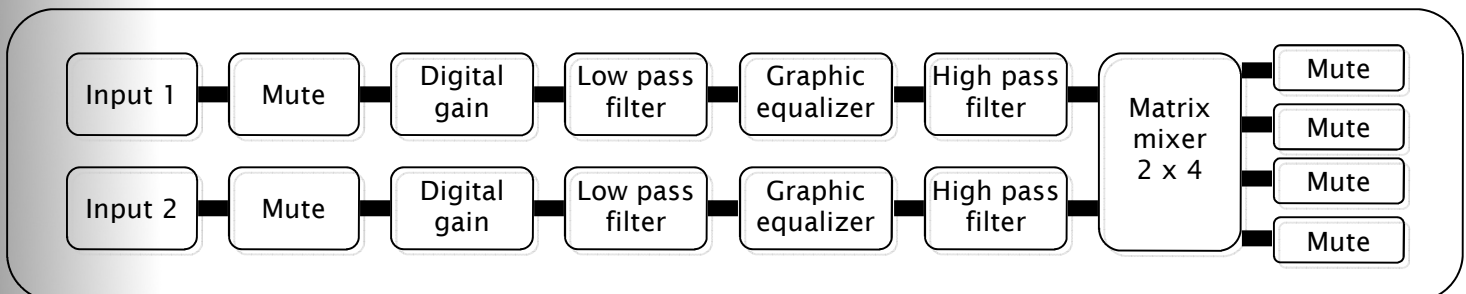

Applications

- . Multi-room audio distribution
- . Multi-channel custom amplifier
- . Musical effects
- . DJ mixer processor
- . Mobile recording audio mixer
- . Custom Pro Audio boards

Algorithm and plug-in configuration

Item	Description
Sampling frequency	48kHz
Algorithm resolution	Double precision for best audio quality (56bits resolution)
Digital Inputs Digital Outputs	Plug-in IN# 1&2 available on I2S_Data_In7&8 Plug-in OUT# 1/2/3/4 available on I2S_Data_Out1/2/3/4 Un-processed signal from ADC on I2S_Data_Out5/6 Un-processed signal from Digital IN on I2S_Data_Out 7/8
Input mute	Click-less input mute per channel
Digital gain	Fader gain control from -80 to 0dB
Input RMS meters	Monitoring signal from -80dBFS to 0dBFS - 150ms refresh
Low/High pass filters	Butterworth/Bessel second order (-12dB/oct) Linkwitz-Riley fourth order (-24dB/oct) Bypass feature
Graphic equalizer	1/3 octave, 31 bands equalizer with +/-15dB boost Channel linking, bypass, reset
High pass filter	Types: Butterworth/Linkwitz Riley/Bessel / Bypass feature
Matrix mixer	2 inputs mixed to 4 outputs Knob control gain from -60 to 0dB gain
Output mute	Individual output mute
Master output gain	Analog potentiometer control fader from -80 to 0dB gain
Output RMS meters	Monitoring signal from -80dBFS to 0dBFS

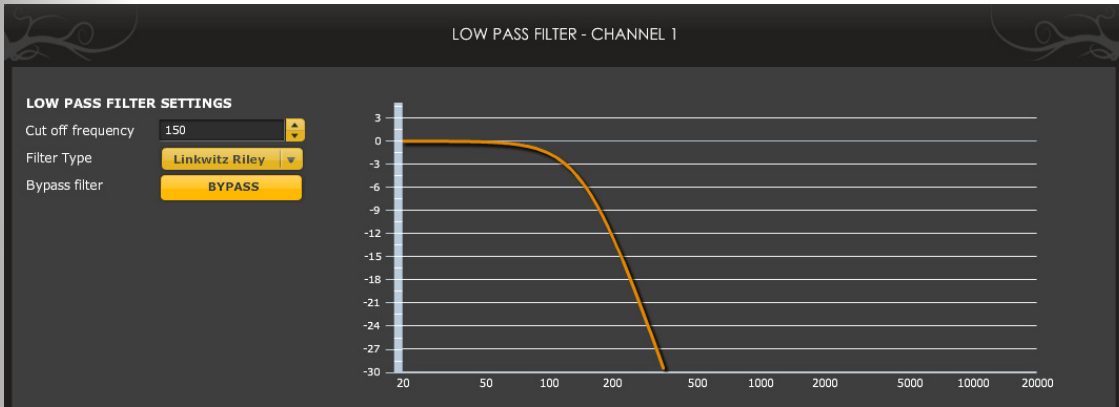

Audio flow chart diagram

Example application diagrams

Low/High pass filter

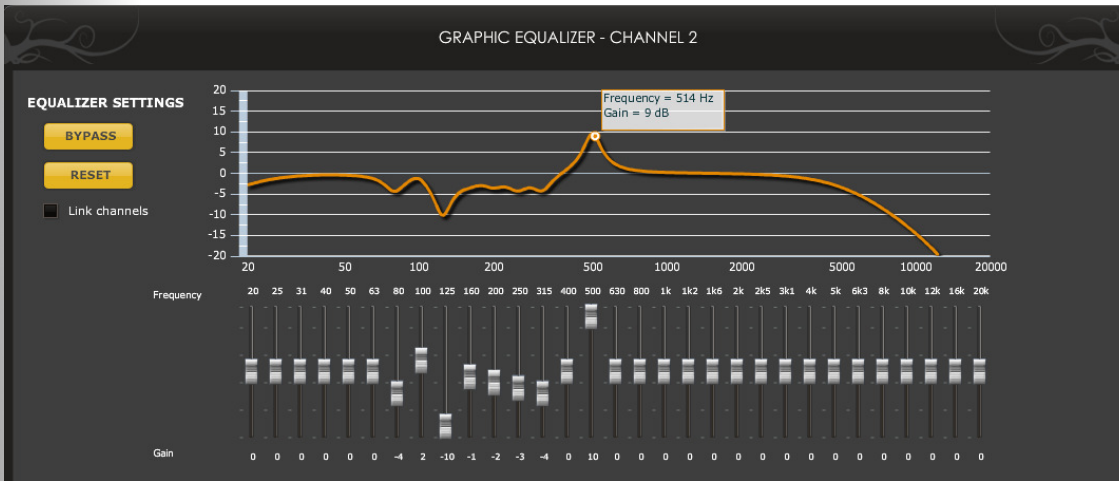

Double precision algorithms (56bits) for greater resolution in low frequency range.

Filter choice to better fit your application.

Complex plotting displays the combined effect of low pass, equalizer and high pass filter.

Bypass feature to listen to the effect of filter settings.

Graphic equalizer

Double precision algorithms (56bits) for greater resolution in low frequency range.

Complex plotting displays the combined effect of low pass, equalizer and high pass filter.

Link channel feature keeps Left & Right input in synch.

Bypass feature to listen to the effect of your equalizer settings.

Matrix mixer & metering

Matrix mixer

Mix your signal from -60 to 0dB as you wish. Ideal to route signal to one of the four audio outputs or simply mix two sources together.

RMS meter displays for input and output channels. Resolution from -80 to 0dBFS (Full scale)

Custom firmware

Looking for a custom firmware for a specific application? Want an OEM version for your own product line?

Our sales and engineering can help. Just email us with a description of your requirements and we'll get back to you with a quote.

Software & Hardware requirements

PC Hardware requirements

- 1GHz CPU
- 512MB RAM
- USB V2.0

Software requirements

- Windows XP/Vista/7
- Adobe Air environment
- Net 3.5 environment

Mac Hardware requirements

- Intel Core Duo or faster
- 512MB RAM
- USB V2.0

Software requirements

- Mac OS X v10.4, 10.5, 10.6
- Adobe Air environment
