miniDSP is proud to introduce the latest member of the SHD (“Streaming High Definition”) processor family. As with all SHD Series processors, the **SHD Power** includes Dirac Live®, the world’s premier room correction solution, and a full suite of miniDSP’s powerful but user-friendly audio tuning software. Dirac Live calibration uses our popular UMIK-1 microphone and Dirac’s easy-to-use calibration tool.

The SHD Power includes a 120W per channel low-distortion power amplifier for powering main speakers, and two additional analog outputs for connecting a subwoofer or subwoofers. With three digital inputs and high-resolution USB Audio, the SHD Power is the ideal modern integrated amplifier, all packed into an unbelievably compact metal enclosure.

We have also included network streaming over Ethernet or Wi-Fi, powered by a dedicated quad-core ARM processor. Out of the gate, we are shipping with Volumio, a popular open-source network streamer. Volumio gives you access to music files from sources as diverse as a USB stick, to files stored on your local network, to Internet Radio and Spotify.
